YOUSEF NAGY

Flutter Developer

01220082754 yousefnagy322@gmail.com Cairo, Egypt yousefnagy322 yousef-nagy

SUMMARY

Results-driven Flutter Developer with proven experience building scalable, cross-platform mobile applications using BLoC/Cubit and Clean Architecture. Experienced in delivering full-lifecycle client projects and integrating AI features such as TensorFlow Lite and Gemini API. Passionate about writing clean, maintainable code, optimizing mobile UI/UX, and creating high-performance applications.

EDUCATION

Bachelor of Computer Science, GPA: 3.62, Thebes Academy — 2021 – 2025, Cairo, Egypt

EXPERIENCE

Freelance Flutter Developer, HealthyNutrition Mobile App — 02/2026 – Present

- Designed and delivered a complete mobile-first UI/UX using Figma, improving user flow
- Converted an existing web platform into a cross-platform mobile application using Flutter.
- Collaborated directly with the client to refine features and branding, accelerating feedback cycles.
- Built and deployed production-ready releases to the Google Play Store and Apple App Store*(WIP)*.
- Improved app rendering performance, ensuring a smooth 60fps user experience across various iOS and Android devices.

PROJECTS

MOI Digital Reporting System , Flutter, Azure App Service, REST API, BLoC/Cubit — 11/2025 – 12/2025

- Engineered a full report submission workflow, including media uploads (images/videos) and real-time status tracking.
- Developed advanced dashboards with filtering, searching, and pagination
- Integrated the fl_chart library to visualize report statistics and accelerate administrative decision-making.

DEPI Hospital Complaint System , Flutter, Azure Backend, API, BLoC/Cubit — 11/2025 – 12/2025

- Created a role-based hospital complaint system allowing patients and staff to submit structured complaints and requests with a guided flow.
- Implemented hospital and department selection with seamless success handling and clear confirmation messages.
- Built user dashboards showing real-time complaint status counts using BLoC/Cubit and REST API.

CancerScan (Graduation Project) , Flutter, TensorFlow Lite, Firebase — 2024 – 2025

- Led the development of a mobile application capable of detecting skin cancer using an on-device CNN model deployed via TensorFlow Lite.
- Integrated Google Maps to recommend nearby doctors and clinics based on user location.
- Implemented an AI-powered chatbot (Gemini API) to answer user questions and guide them through the diagnosis flow.

Collaborative Shopping List , Flutter, Dart, Firebase

- Developed a real-time collaborative shopping list application.

Weather App , Flutter, Dart, REST API

- Built a responsive weather application fetching live forecast data.

Coffee App , Flutter, Dart

- Created a highly customized UI for a coffee shop application.

SKILLS

Languages
Dart, Python, C++

Frameworks & SDKs
Flutter, TensorFlow Lite

Architecture & Design
Clean Architecture, MVC, MVVM, RESTful APIs, JSON Integration, Responsive UI

State Management
BLoC/Cubit

Tools & Version Control
Git, GitHub, Figma

Backend & Cloud
Firebase, Azure App Service

COURSES

Digital Egypt Pioneers Initiative (DEPI) — Cross-Platform App Development Track , MCIT Egypt — 06/2025 – 12/2025

Complete Flutter & Dart Development Course, Tharwat Samy

Mastering Flutter: Responsive & Adaptive UI Design, Tharwat Samy

Flutter Advanced Course Bloc and MVVM Pattern, Tharwat Samy

Master Git & GitHub: Essential Skills for Developers, Tharwat Samy

Flutter App Creation: Google Maps Integration Guide, Tharwat Samy
